

### Motions Requesting Expedited Relief

- Requests to shorten the notice period should be made by separate motion filed and served before or at the same time as the underlying motion.
- Parties seeking expedited adjudication are invited to advise the court by telephone that they have filed a motion to shorten time. Whenever so advised, the court will endeavor to consider the motion promptly.
- Once the court has ruled on the request to shorten notice, notice of the underlying motion and any hearing date should be given as directed by the court's order.
